Eyelash or Eyebrow treatment instructions

Pre-treatment Instructions:

- Avoid brow waxing 48 hours before your brow lamination treatment.
- Come to your appointment with clean eyelashes without mascara or eye makeup.
- Do not wear contact lenses to your appointment or remove them immediately prior to treatment.
- If you have any current eye disorders, injuries, or inflammation, you will not be eligible for treatment.

Post-Care Instructions:

- Avoid putting contact lenses back in for 24 hours after lash lift.
- Avoid rubbing the eye region for 24 hours after treatment.
- Do not get eyelashes or eyebrows wet for 24 hours (no showering, washing your face, sweating, and/or swimming).
- Do not use any makeup, oils, oil-based makeup removers, or creams in the eye region for 24 hours.
- Do not receive any other eye treatment for at least 24 hours after your treatment.
- It is not recommended to use eyelash curlers, as they could cause lash breakage.
- Periodically brush lashes upward using a disposable mascara wand, as this can help secure the lift within the first 24 hours.
- Results typically last 3-6 weeks.

Please call 316-682-7546 if you have any questions or concerns after your procedure.
